

# PLAYER EVALUATION/TRYOUT SCORING SYSTEM

Tryout evaluators will be expected to provide evaluations for all players at the end of the Tryouts and will include recommendations for the appropriate playing level for next season. These evaluations are based on the Ajax TIPS method.

Evaluators will be expected to record the following information on players based on their observations during the Tryouts:

- TECHNICAL:** What level would you recommend for the player based on the players technical ability to help them to improve in this area, is the player comfortable on the ball in high pressure situations to play at the Gold Level or do they need more time to be more successful on the ball.
- INSIGHT:** What level would you recommend for the player based on the players tactical knowledge and game understanding to help them develop in this area, does the player have a good understanding for the game, positional sense when attacking and defending, imagination and speed of thought (Tactical Knowledge).
- PERSONALITY:** Is the player committed, has a good attitude, positive towards others and demonstrates good leadership qualities.
- SPEED:** What level would you recommend for the player based on the player's speed, does the player have the overall quickness of feet, speed of thought, good general speed over ground and quick reaction time?
- Overall Grade:** At what playing level would you consider this player to be at to help them improve and continue to develop their soccer skills and understanding for the game. (Gold, Silver, Bronze)?
- Comments:** General comments and observations might include: player qualities and deficiencies, areas for the player to improve, recommended playing position.
